ELECTRIC DIGITAL PANEL HEATER
HMPH22**ErP** LOT 20✓

7 DAY PROGRAMMABLE TIMER

ENERGY SAVING- OPEN WINDOW DETECTION
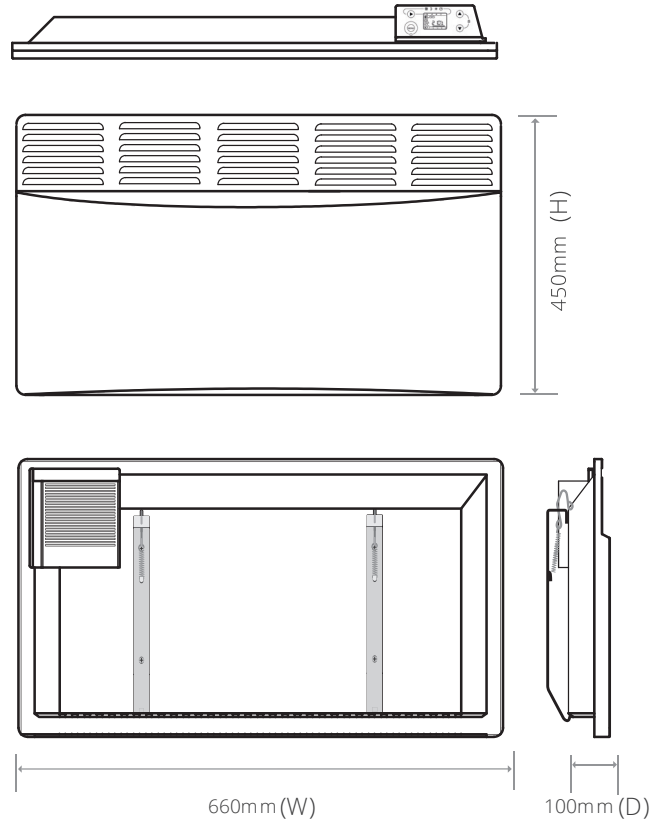

CHILD/USER LOCK

FAST HEAT UP

■ DESCRIPTION

The new series panel heaters by Heat Matrix are a modern and reliable solution for electric heating. Ideal for commercial buildings, hotels, student accommodation sites, holiday homes, domestic dwellings and garden offices.

The shape of the air outlet fins allow for gentle heat distribution for a perfectly heated room. On board controls incorporate various options to control and manage your heating requirements. OWD - open window detection, an energy saving technology, is included as standard and implemented in our controls.

HMPH22ErP panel heaters have an adjustable max SP range (7-28°C), 5 pre-set heating modes including 'away mode' for long periods of inactivity. All units are wall mounted with brackets and a fixing template supplied as standard. Optional floor standing feet ar available. Suitable for bathroom installation. **This unit comes with a 2 year warranty.**

■ DIMENSIONS (1500W)

450mm (H)

660mm (W)

100mm (D)

■ TECHNICAL DATA
